

HASHAN PERERA

Software Engineer - React | C#/.NET | Angular | AWS

Horana, Sri Lanka | +94 77 553 8374 | hashperera.v@gmail.com | [LinkedIn](#) | [GitHub](#)

Software Engineer with **3+ years of** experience developing and supporting enterprise-grade full-stack applications using C#, .NET, React, Angular, NestJS, SQL Server, MongoDB, and AWS. Experienced in frontend and backend architecture, REST API design, Clean Architecture, CQRS, SOLID principles, design patterns, secure application development, code reviews, CI/CD, and production support. Led development within a 3-engineer team, conducting code reviews and contributing to architectural decisions while delivering scalable production applications.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, TypeScript,

Backend Frameworks: ASP.NET, NestJS, Express.js

Frontend Frameworks: Angular, React, NextJS

Core Engineering: OOP, SOLID, Design Patterns, CQRS, MediatR, Data Structures & Algorithms, REST API Design,

Database: MS SQL Server, MySQL, PostgreSQL, MongoDB

Mobile: React Native (Expo)

Cloud & DevOps: AWS (EC2, ECR, ECS, S3), Docker, GitHub, GitLab, GitHub Actions, CI/CD

ERP & CMS: SAP Business One (SAP B1 - Service Layer), Sitecore XP

APIs & Security: RESTful APIs, GraphQL, WebSockets, JWT, Auth0

Testing & Quality: Xunit, Jest, Jasmine, Karma, Postman, Swagger

UI Libraries: Bootstrap, Tailwind CSS, Ngx-Bootstrap, Prime NG

AI-Assisted Development: GitHub Copilot, Claude Code, Cursor, Antigravity, Codex, LLM Prompt Design

Working Knowledge: Java, Python,

PROFESSIONAL EXPERIENCE

Software Engineer | [IGT1 Lanka](#) - [Sitecore](#) | **May 2026 - Present**

- Provide enterprise technical support for Sitecore XP, investigating and resolving complex application and production issues reported by global customers.
- Debug .NET-based applications, analyze SQL Server data, configurations, and application behavior, and implement code-level fixes to resolve identified defects and production issues.
- Work within a large enterprise software environment, developing and validating solutions while following structured engineering, troubleshooting, and customer communication practices.

Software Engineer | [DigitusTec](#) | **July 2025 – April 2026**

Meeting Minutes Platform | Angular, NestJS, MongoDB, Docker, Auth0, AWS

- Led the end-to-end development of the Meeting Minutes platform as Lead Developer, defining the Angular architecture, project structure, and CI/CD workflows for a 3-engineer team, while conducting regular code reviews to maintain code quality and consistency.
- Designed and developed responsive Angular modules for meetings, tasks, and approvals, integrating REST APIs and optimizing large data tables (rendering, filtering, pagination), resulting in improved usability and performance at scale.
- Architected the backend using NestJS, implementing a robust RBAC security model with Auth0 JWT authentication and Docker-based deployment standards, ensuring enterprise grade security and production readiness for the Phase 1 release.
- Optimized MongoDB queries using aggregation pipelines and indexing strategies, significantly improving API response times and overall system performance.

CRM System | Angular, NestJS, MongoDB, Auth0, SonarQube, Antigravity, AWS

- Developed key CRM modules including Lead Management, Customer Management, Sales Pipeline, and Cold Calling workflows using Angular and TypeScript, delivering responsive and reusable frontend components.
- Adopted an AI-driven development approach using Antigravity alongside SonarQube, accelerating feature implementation, code refactoring, and quality validation while maintaining high code-quality standards.

Quality Control System (Zambia) | Angular, NestJS, MongoDB, AWS, SAP B1

- Contributed to integrating the application with the SAP B1 ERP systems, Covered key workflows, including PO, GRN, Goods Returns, Production Receipts, and IBT.

CYOL | Angular, NestJS, MongoDB, AWS , thecyol.com

Associate Software Engineer | [DigitusTec](https://digitustec.com) | January 2024 – June 2025

OUTGROWER Mobile App (Zambia) | Flutter, NestJS, MongoDB, Hive DB, SAP B1

- Solely developed an offline first mobile application for a Zambian agricultural company to manage external farmers and enabling field access for 500+ users.
- Implemented Flutter (GetX) for state management with Hive for local offline storage, including a queued synchronization mechanism with retry handling to support low-connectivity environments.
- Developed a scalable NestJS backend and integrated with SAP B1 Service Layer. Responsive flutter UI and optimized for field usage.

Trainee Software Engineer | [DigitusTec](https://digitustec.com) | June 2023 – December 2023

FREELANCE AND PROFESSIONAL PROJECTS

LilyLanka – Travel & Tourism Platform | React, C#, .NET, CQRS, MediatR, Clean Architecture, REST APIs

- Worked as a Contract Software Engineer for 3 months, developing the **Tours and Tour Packages** modules across React and .NET, including frontend interfaces, backend business logic, and REST API endpoints.
- Implemented backend features using **Clean Architecture, CQRS, and MediatR**, separating commands and queries to improve maintainability, scalability, and separation of concerns.
- Built reusable React components and integrated them with .NET REST APIs to deliver responsive, end-to-end travel and tour management features.

InsureGeini (Final Year Research project - Grade A, NBQSA Selected) | [InsureGeini-GitHub](https://insuregeini.github.io)

- Developed an AI-powered insurance platform that automates claim processing by integrating vehicle damage detection, fraud detection, customer sentiment analysis, and incident to policy mapping to streamline end to end decision making. AI | ML | NLP | OCR | YOLO | VGG16 | DeepFace | CNN | Colab | Python | Microservices | AWS | ECS | Docker | CI/CD | GitHub | RabbitMQ

EDUCATION

2021 – 2025 BSc. (HONS) Information Technology, Specialized in Software Engineering (Second Class Upper)
Sri Lanka Institute of Information Technology. (SLIIT), Malabe.

G.C.E. A/L 2020: Physical Science - 1B, 2C | **G.C.E. O/L 2017:** 9A - Taxila Central College, Horana.

RESEARCH & PUBLICATIONS

- **Leveraging Multi Modal AI Capabilities to Enhance Vehicle Insurance Claiming Process.** 5th International Conference on Electrical, Computer and Energy Technologies. ICECET 2025 Paris. (Peer-reviewed InsureGeini system)
- **Cognitive Complexity Analysis and Optimization Tool for Java.** [Researchgate.net](https://www.researchgate.net)
